

PROFESSIONAL EXPERIENCE

Cohesity, Inc. | Software Engineering Intern | Santa Clara, CA May 2025 — Dec 2025

- Architected orchestration microservices to manage distributed virtual environments, provisioning resources across AWS and Azure.
- Contributed clean, testable code to the core infrastructure APIs using Python and FastAPI, facilitating product quality assurance (QA) scenarios and accelerating the Software Development Lifecycle (SDLC).
- Developed scalable provisioning platforms using Docker and Kubernetes, and designed interactive monitoring dashboards for real-time tracking of system health.

Veritas Technologies LLC | Associate Software Engineer | Pune, MH July 2023 — August 2024

- Engineered and deployed a proprietary System Integration Testing (SIT) platform using Python and SQL to automate validation across large-scale distributed applications.
- Built internal monitoring and alerting dashboards for distributed services and database clusters, reducing the mean time-to-detect (MTTD) issues by 30%.
- Developed APIs for data and workflow management using MS SQL Server and Oracle databases, improving data accessibility.

Veritas Technologies LLC | IT Intern | Pune, MH January 2023 — June 2023

- Deployed a full-stack Database Central Repository integrating REST/gRPC APIs and Scikit-Learn models, cutting data-lookup latency by 50%.

Eluminous Technologies | Software Developer Intern | Nashik, MH February 2022 — May 2022

- Architected and developed a modern full-stack application leveraging React on the frontend and Node.js with TypeScript on the backend.
- Implemented scalable RESTful APIs to support 10K+ monthly active users and optimized performance for 25% faster page loads.

EDUCATION

Arizona State University | Master of Science in Software Engineering (Data Science Spec.) August 2024 — May 2026

Savitribai Phule Pune University | Bachelor of Engineering in Computer Engineering August 2019 — May 2023

PROJECTS

Aura-Flow - Autonomous AI Engineering Assistant February 2026 — Present

- Architected an advanced, multi-agent AI orchestrator using Python, FastAPI, and LangGraph state machines to dynamically plan, code, and self-test logic sequences.
- Engineered a real-time Next.js and React 19 dashboard utilizing Server-Sent Events (SSE) and TextDecoder streams to seamlessly visualize agent thought processes.
- Integrated Google Gemini 2.5 Flash with custom template sanitization, mitigating hallucination risks and preventing arbitrary code execution vulnerabilities.
- Developed a self-healing node loop that natively executes generated code in a sandbox, automatically rerouting stderr logs back to the coding agent for iterative debugging.

Hazard-KG - Capstone Project January 2026 — Present

- Engineered a comprehensive graph architecture to process and mathematically structure vast amounts of disparate threat intelligence.
- Built a pipeline that creates rapid correlating nodes and AI-driven insights for automated, multi-dimensional risk analysis.

Travel Path - Intelligent Itinerary Planner November 2024 — December 2024

- Engineered a full-stack Intelligent Itinerary Planner (React, FastAPI, PostgreSQL) using semantic knowledge graphs to solve itinerary planning, with results published as a research paper in IEEE COMPSAC 2025.
- Built a data-driven recommendation engine using SPARQL queries on GraphDB, enabling dynamic, real-time suggestions and increasing itinerary relevance by analyzing user behavior patterns.

SKILLS

Programming & Web	Python, JavaScript, Java, C/C++, Go, SQL, HTML/CSS, JSON, XML/YAML
AI/ML & Edge Concepts	PyTorch, TensorFlow, Keras, ONNX, Agentic AI, MLOps, Edge Computing, IoT Concepts
Frameworks & APIs	React.js, Node.js, FastAPI, Next.js, Express, OAuth, REST/gRPC APIs
Cloud & DevOps	AWS (EC2, S3, EBS), Azure, GCP Storage, Kubernetes, Docker, Terraform
Databases & Systems	MySQL, PostgreSQL, MS SQL Server, Oracle, MongoDB, Elasticsearch, Kafka
Tools & Agile SRE	Git, GitHub, Jira, Confluence, Agile, Prometheus, Grafana, CI/CD
Debugging & OS	Linux, Bash, PowerShell, GDB, PDB, Profiling, Distributed Troubleshooting
